SUMMARY

Full-Stack Engineer with a strong track record delivering scalable SaaS platforms, real-time systems, and e-commerce solutions across fintech, maritime, and retail verticals. Experienced leading backend architecture and integrating complex third-party services — payments, AI, and live data pipelines. Consistently ships performant, well-architected products that align engineering decisions with business outcomes.

CORE SKILLS

Frontend

React.js, Next.js (v14/15), TypeScript, JavaScript ES2022+

Backend

Node.js, Express.js, NestJS, C#, Firebase, REST & GraphQL APIs

Database

PostgreSQL, Supabase, Firestore, Prisma ORM

Payments

Paystack, Stripe, Webhook handling, Transaction reconciliation

Auth

NextAuth v4, JWT, OAuth 2.0, RBAC

AI / RT

AI chat integration, SSE, Real-time data pipelines

Styling

Tailwind CSS, Framer Motion, CSS3, HTML5

DevOps

Git, GitHub Actions, Vercel CI/CD

EXPERIENCE

Full-Stack Engineer — Backend Lead

Nubia Astar · Contract · Jan 2025 – Present

- **Architected and led backend development** of PrimX, a marine engineering listing & e-commerce platform serving B2B industry procurement workflows.
- Engineered **Paystack payment integration** with webhook event handling, order lifecycle management, and transaction reconciliation.

FEATURED PROJECTS

PrimX — Marine Engineering E-Commerce

Stack: Node.js, Firebase, React, TypeScript, Tailwind CSS

- B2B marketplace for marine engineering equipment listings, procurement, and supplier management — flagship product for Nubia Astar.
- Paystack checkout with webhook reconciliation and full order lifecycle management.
- AI-powered live chat for real-time buyer–seller interaction and automated support.
- Firestore real-time database with optimised read/write patterns for concurrent users.

Spendly — Finance SaaS Dashboard

Stack: Next.js 14, TypeScript, Prisma 7, Supabase, NextAuth v4, Recharts

■ spendly-steel.vercel.app

- Multi-tenant personal finance platform: budget tracking, transaction history, analytics, and real-time SSE alerts.
- Custom category engine with color theming, multi-currency support, and avatar upload system.
- App Router + server components architecture delivering sub-100ms interactions.

MarketStore — E-Commerce Platform

Stack: Next.js 15, TypeScript, Stripe, Supabase, Tailwind CSS

■ nextjs-storeweb.vercel.app

- Full-stack retail platform: Stripe checkout, SSE real-time order tracking, role-based admin.
- Dark luxury UI with production-ready webhook infrastructure and zero payment errors post-launch.

Portfolio — Design-Engineering Showcase

Stack: Next.js, Framer Motion, TypeScript, Tailwind CSS

■ talesoftoba.vercel.app

- Spring-physics animations, eye-tracking contact button, and infinite marquee — advanced motion design implementation.

- Built and deployed an **AI-powered live chat** system to streamline buyer–seller communication at scale.
- Designed Firestore data models and real-time sync pipelines supporting high-concurrency listing and inventory operations.
- Defined TypeScript/React API contracts with frontend team, eliminating integration regressions across releases.

Senior Frontend & Full-Stack Engineer

Freelance / Independent · 2023 – Present

- Delivered **Spendly**, a multi-tenant SaaS finance dashboard with real-time SSE budget alerts, multi-currency ledger, and Recharts analytics — zero downtime since launch.
- Built **MarketStore**: full e-commerce platform with Stripe checkout, webhook-driven order status, and role-based admin panel.
- Implemented **NextAuth v4 / JWT** authentication and RBAC across multiple production client applications.
- Resolved production-critical issues: Prisma adapter migrations, SSE deduplication, and Supabase PostgreSQL hydration edge cases.
- Maintained CI/CD pipelines on Vercel with environment-specific configurations across all projects.

EDUCATION

BSc, Mass Communication

University of Ilorin, Nigeria

KEY STRENGTHS

- Led backend architecture on a B2B flagship platform from greenfield to production.
- Owns payment and authentication systems — highest-trust engineering domains.
- Effective across the full stack: DB schema design to pixel-level UI polish.
- Strong API contract discipline; thrives in cross-functional team environments.
